July 2015

Walking Your Dog

- On hot days, put the back of your hand on the pavement for 5 seconds; if it is too hot for you, it is too hot for your dog
- Try to walk them on the grass as much as possible during hot days
- Try to avoid walks when the sun is at its strongest (1-4pm)
- If you cannot avoid it, take them on a few short walks (10-15 minutes) instead of one long walk

In the Car: Do not leave an animal in the car alone!

- To limit mobility and prevent injury, use a dog car harness or secure the leash to the seatbelt
- Alternatives to leaving your pet in the car: leave your pet at home, drive-thrus, pet-friendly outdoor restaurant, bring a friend, or book a visit or in-home with JPC!
- If you see a pet in a hot car: stay with them, try to locate the pet parent, or call for help (OSPCA 310-7722 or your local police station)

Many cats love to eat plants; however, there are over 700 types of plants that can harm animals through ingestion. Some common ones include:

- | | |
|-------------|-------------------|
| • Lilies | • Chrysanthemums |
| • Aloe vera | • Begonias |
| • Tulips | • Carnations |
| • Azaleas | • Daffodils |
| | • Morning glories |

Safety Tips for Birds

- Clean their water at least once daily due to bacteria buildup. Use bird friendly water!
- Apply cornstarch to a cut or broken blood feather to clot the blood
- Watch for things that they can get their feet caught in

Summer Promotion

Book 1 hour yard cleaning,
 enjoy 1/2 hour complimentary!

Book 2 hours house cleaning,
 enjoy 1 hours complimentary!

Valid June 1, 2015 until September 1, 2015

Spread the word! Send to your friends, have them mention your name, and the same offer applies to them.
 Some restrictions apply.
